

## How to make stickers for your exercise book

Before you print your stickers, you need some strong paper to make them more sturdy.

Print the page with the stickers on a colour printer. There are ten stickers on one page.

First, you need to cut the white edge around the images along the outer line.

Now you can cut the page along the white line to separate stickers from each other.

Glue the separated stickers on your exercise books with an adhesive stick.

Now you can fill in your name, your subject and your class.

Have fun!
