

How to make stickers for your exercise book

Before you print your decorations, make sure you have some strong paper so that they're sturdy.

Print the page with the decorations on a colour printer. There are ten designs on one page.

First, you need to cut the white edge around the images, along the outer line.

Now you can cut the page along the white line to separate the stickers from each other.

Glue the separated stickers on your exercise books with an adhesive stick.

Now you can fill in your name, subject, and class.

Have fun!
