

HOW TO MAKE A MEASURING BAR

1

First, print the three pages with the parts of the measuring bar on a colour printer. Then cut out the parts and attach them to each other with adhesive tape.

2

Make sure that you glue them at the right place so they are slightly overlapping. Now you can hang the measuring bar on the wall or door in your room!

3

Position yourself with your back to the measuring bar to measure your size. How big have you become? Write your name and the date at this position!

Have fun!
