

How to make stickers for your exercise book

1

Before you print your decorations , make sure you have some strong paper so that they're sturdy.

Print the page with the decorations on a color printer. There are ten designs on one page.

First, you need to cut the white edge around the images, along the outer line.

2

Now you can cut the page along the white line to separate the designs from one another.

Also, be sure to cut the white corners very carefully.

3

Glue the separated decorations on your assignment book with a glue stick.

Now you can fill in your name, subject, and grade.

Have fun!
