

Your Dragons Party Cone

You will need:

A school bag shaped piece of cardboard

Cardboard:

- Yellow (for the fish tails)
- Black (for Toothless' wings and face)
- Green (for the eyes)
- White (for details)

Crepe paper in different colours used in the example:

- red, orange and blue
- cotton
- Tape/String
- Sheer sheets in 2 shades of blue (for the water)

Besides:

- Hot glue gun
- Pencil
- White crayon
- Scissors
- Glue stick
- Liquid glue
- Ruler

1st step

Cut out all of the pieces and stick them on to a piece of cardboard. This way, you will get a stable template which will come in handy for the next steps.

2nd step

Now, use the templates to cut the patterns out of the cardboard. Repeat with the remaining stencils.

3rd step

Use the pens to draw on the details and decorations.

4th step

Now you can glue the parts together using liquid glue.

Glue the parts together using the liquid glue. For the waves, it's best to use a glue stick.

You can decorate the clouds with cotton wool.

5th step

Grab a piece of string to start making the garland. Place the string all the way around the party cone to measure its length. Then, cut the string to the correct length. Make sure you leave enough room for the dragon's head.

Put some glue on the sticky surfaces of the flags and place the string on the fold line. Now, stick the flags to the string, leaving some room between them.

6th step

Next, decorate the school bag.

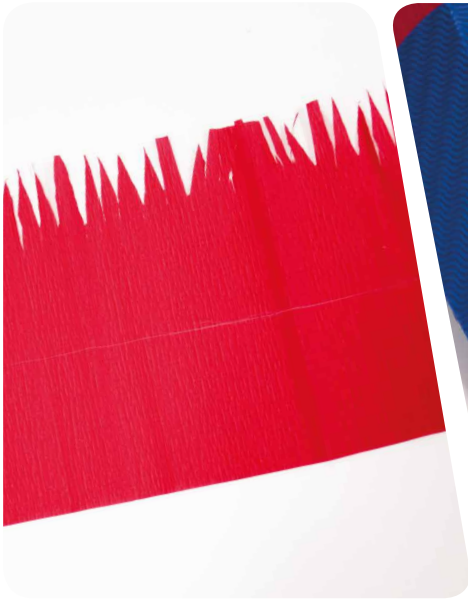

Cut three layers of crepe paper. Make sure that the first layer is the shortest and the other two layers are longer. The longest layer should have enough room to be tied to the party cone.

Then, cut slits into the bands from the top, so it looks like fire.

7th step

Glue the shortest layer of crepe paper to the upper edge of the party cone. Stick the second shortest layer on top and the longest layer on the inside. For a stronger hold, you can crinkle up the paper a little.

Once all layers are glued together, you can close the party cone, glue it together and pad it with some newspaper for stability.

8th step

Cut a ribbon from the remaining crepe paper and place the dragon on it. Now, all you need to do is glue on the individual parts using the hot glue gun.

To make the dragon's wings stick out more, they can be folded in at the sides.

9th step

Now, the party cone can be filled with PLAYMOBIL treats and surprises. Tie the strings and off we go!

The PLAYMOBIL team wishes you lots of fun with your party cone.
