

Make your own bookmark:

**Before printing your bookmark, please use thicker paper to make the bookmark more stable. After printing, you can color your bookmark in your favorite colors.**

**If you use felt pens, the colors will look even more dynamic. First you cut the pattern along the outer line.**

**Now you can perforate a hole at the top of your bookmark.**

**After putting a colored piece of rope, ribbon or friendship bracelet through the hole, your bookmark is ready!**
