

# Pirate 's Hat

First get some strong paper to make the hat sturdier.

To make the hat fit your head better later on, first cut a narrow strip of paper, which is placed around your head to measure and ensure the fit. You can attach it at the ends with a stapler or glue the strip together.

You need two copies of the hat template. After you cut them out, you can tape the two sides to your previously measured strip of paper. After you cut them out, you can tape both sides of your stripes. The middle part is sufficient for this. The two ends can be glued or stapled together again.

At the bottom you'll find some extra decorations to decorate your hat.

Your Playmobil team wishes lots of fun
