

WE'LL MAKE A CROWN.

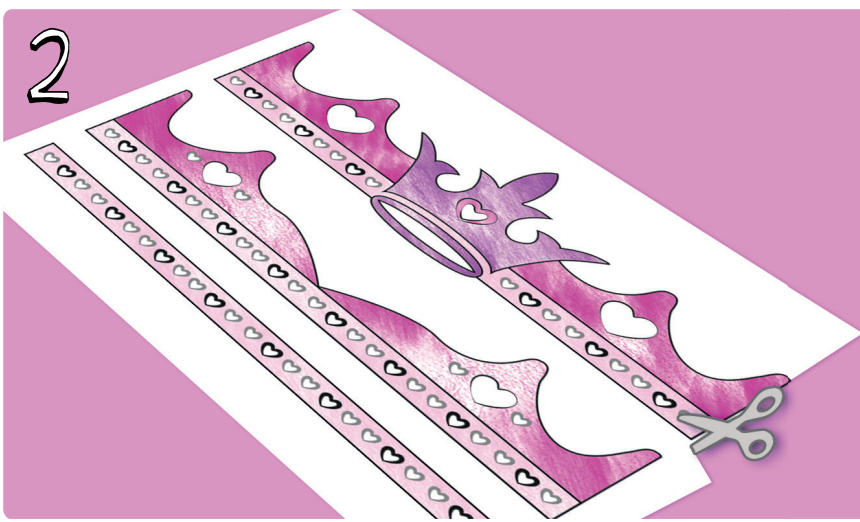

1

First of all get thick paper.

Then print the required number of crowns on a printer. Each sheet shows a crown including an extension. First colour in the crown completely.

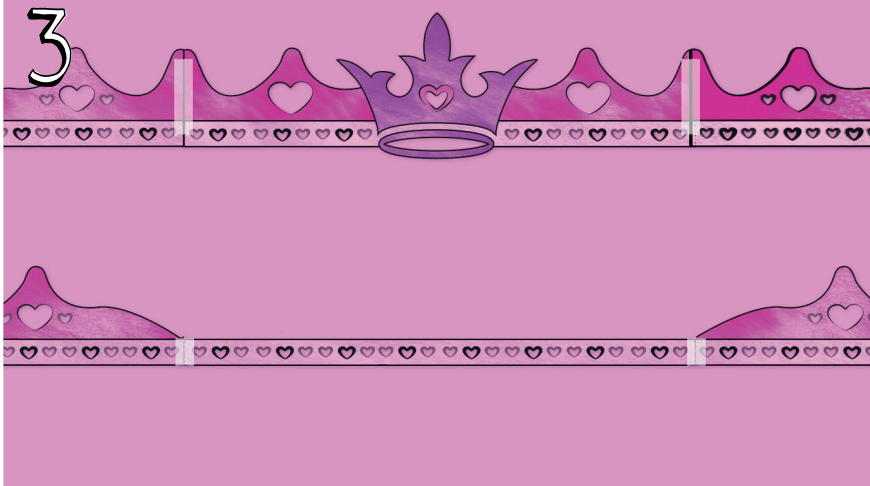

2

Then cut out the crown along the black lines.

The lowest section serves as an additional extension and, depending on the size of the child's head, is not absolutely necessary.

3

Now you can glue the individual parts together with an adhesive tape and adjust them individually to your head circumference.

In this way each of your friends can make her own crown.

Have fun!
