

PONY OR HORSE?

THE MAIN DIFFERENCE BETWEEN PONIES AND HORSES IS THEIR SIZE. ALL HORSES UNDER 148CM ARE PONIES.

WHAT IS THE SMALLEST HORSE BREED IN THE WORLD CALLED?

THE FALABELLA MINIATURE HORSE IS 86CM OR LESS. THE ONLY HORSE SMALLER THAN THIS IS THE PLAYMOBIL PONY AT 4.5CM.

MICROSLEEPER

HORSES ARE ALWAYS READY TO GO. A HORSE WILL ONLY LIE DOWN TO REST IF HE FEELS ABSOLUTELY SAFE, OTHERWISE, HE WILL JUST DOZE OFF.

RESTING STANCE

HORSE EARS SEND AND RECEIVE MESSAGES

IF THE EARS ARE TILTED TO THE SIDE OR SLIGHTLY BACKWARDS, THE HORSE IS RELAXED. SPIKED EARS SIGNAL INTEREST AND CURIOSITY. IF A HORSE IS AFRAID OR ANNOYED, IT PLACES ITS EARS FLAT BACKWARDS.

THE LANGUAGE OF HORSES

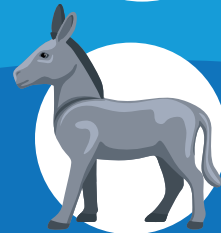

HORSE'S MOUTH

A HORSE WILL "SNAP", BY OPENING AND CLOSING ITS JAW, TO ACKNOWLEDGE THE DOMINANCE OF A HIGHER RANKED HORSE IN THE HIERARCHY

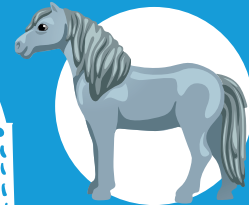

WHEN HORSES NEIGH, THEY ARE CALLING EACH OTHER FROM A DISTANCE. THEIR PEERS, AND EVEN PEOPLE, WELCOME THEM WITH A FRIENDLY HUM. IF THEY SQUEAL, BE CAREFUL! IT MEANS THEY ARE ANNOYED OR ARE GIVING A WARNING.
