

THE MATCHING GAME OF NOAH'S ARK

Before you print your cards, make sure you have some strong paper so that they're sturdy.

Print each page card patterns twice using a colour printer. There are twelve cards on each page.

Then, cut each card out along the dashed lines.

To start playing, mix up all cards first. Then, lay out each card with the printed side facing down on the table.

Now each player may turn over two cards per turn. If you find a matching pair of cards, you can keep it and turn over two more cards.

If the cards don't match, turn them back over and have the next person to take a turn.

When all of the pairs of cards have been found, the game is over. The player with the most card pairs wins the game!

Have fun!
